

# E.SUN FHC Sustainable Procurement Policy

E.SUN is an honest and upstanding company dedicated to integrity and professionalism. Corporate social responsibility is integrated into its financial business, and sustainability in business, society, and the environment is the goal. Following the "Pure as Jade, Sturdy as Mountain" philosophy and the ISO 20400 sustainable procurement guidance, E.SUN has devised a sustainable procurement policy intended to reduce procurement risks and create opportunities and to achieve sustainable supply chain management.

- I. Make sure to include sustainability in the procurement process, and take responsibility for the impact of procurement on society, the economy, and the environment.
- II. Review procurement requirements and consider the life cycle costs and benefits in order to find more sustainable procurement practices.
- III. Establish procurement guidelines based on transparency, fairness, and integrity, and prohibits strictly any unethical conduct.
- IV. Respect, assess, and respond to procurement rights of interest to stakeholders.
- V. Comply with the laws and regulations, international code of conduct, and international human rights policy, and require that suppliers comply with the same rules.
- VI. Encourage suppliers to switch to innovative and sustainable practices, and provide fair competition.
- VII. Improve the sustainable procurement process on an ongoing process, and encourage everyone on the supply chain to join the effort.
